DETAILED ACTION

Authorization for this examiner's amendment was given in a telephone interview with Weishi Li on 9/20/04.

Cancel claims 63, 64, 84, and 85.

The following is an examiner's statement of reasons for allowance:

The instant invention is directed to methods for reducing false positives in methods for the identification of interacting molecules via recognition of the possible presence of auto-activating molecules to be selected against via various aspects of host cell and genetic element design, optionally with selectable markers and counterselectable markers therein. The closest art of record is that of either Fields et al. (P/N 5,283,173) or Brent et al. [Ann. Rev. Genetics 31 :663 (1997)]. These documents, however, neither teach nor suggest the instantly claimed auto-activation counter selection methodology combined with optional selectable and/or counterselectable markers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
